# Author Index to Volume 77

References with (A) are to abstracts of papers presented at meetings of the American Physical Society, and those with (T) designate title only. References with (L) are to Letters to the Editor.

**Abraham, Bernard M.** Properties of liquid helium 3 and of mixtures of helium 3 and helium 4—739(T)
—— (see Weinstock, B.)—400(L)
**Adair, R. K.** Dependence of neutron cross sections on mass number—748(A)
**Adams, Edward N.** II. Properties of deuteron and triton from h.f.s. measurements—755(A)
**Agnew, Harold M.** Beta-spectra of $Cs^{137}$, $Y^{91}$, $61^{147}$, $Ru^{106}$, $Sm^{151}$, $P^{32}$, and $Tm^{170}$—655
**Akeley, Edward** (see Hoffman, Gerald)—761(A)
**Akioka, Tetsuo** (see Itoh, Junkichi)—293(L)
**Alburger, D. E.** (see Hughes, D. J.)—726(L)
**Aldrich, L. T. and C. E. Smith.** Mass spectrometric production of oxide cathodes—744(A)
**Alfvén, H.** On the solar origin of cosmic radiation. II—375
**Allen, A. J., J. F. Nechaj, K. H. Sun, and B. Jennings.** Fast neutron yield from the cyclotron—752(A)
**Allen, James S.** (see Klema, E. D.)—661
—— (see Smith, Philip B.)—747(A)
**Allison, H. W.** (see Moore, George E.)—246
**Allison, S. K., J. H. Montague, and A. H. Morrish.** Values of certain $(p,\gamma)$ resonances below 400 kv—754(A)
**Allred, J. C.** Differential cross section of the reaction $He^3(d,p)He^4$ at 10.2-Mev bombarding energy and search for excited state in $He^4$—753(A)
**Alvarez, L. W., A. Longacre, V. G. Ogren, and R. E. Thomas.** Electrical detection of artificially produced mesons—752(A)
**Anderson, D. L. and M. L. Pool.** Radioactive xenon 125, and xenon 127—142(L)
**Anderson, Roy S.** (see Burkhalter, James H.)—152(L)
**Anderson, Wallace E.** (see Simmons, James W.)—77
**Andersson, G.** (see Bergström, I.)—851(L)
**Anslow, Gladys A. and Hsi-teh Hsieh.** Absorption bands in the ultraviolet continua of associated primary and secondary alcohols—423(A)
**Arfken, G. B.** (see Breit, G.)—569(L)
**Arnold, W. R.** Use of selenium rectifiers in a 500-kev generator—758(A)
**Arnous, E.** Coherent scattering of x-rays by atoms with more than one electron according to the one-electron theory and the positron theory—149(L)
**Arroe, O. H.** Hyperfine structure and isotope shift in barium—745(A)
**Avery, R.** (see Blanchard, C. H.)—756(A)

**Bailey, Carl L. and William R. Stratton.** Cross section of the $C^{12}(p,\gamma)N^{13}$ reaction at low energies—194
**Bailey, V. A.** On the relativistic electromagneto-ionic theory of wave propagation—418(L)
**Baldwin, H. W.** (see Simpson, J. A.)—751(A)
**Ballentine, Robert** (see Miller, Warren W.)—714(L)
**Barbour, Ian.** Magnetic deflection of cosmic-ray mesons using nuclear plates—751(A)
**Bardeen, J.** (see Pearson, G. L.)—303(L)
—— (see Shockley, W.)—407(L)
—— **and W. G. Pfann.** Effects of electrical forming on the rectifying barriers of *n*- and *p*-germanium transistors—401(L)
**Barkas, Walter H.** (see Bradner, Hugh)—462
**Barschall, H. H.** Use of fast neutrons for the study of nuclear energy levels—739(T)
**Bartholomew, G. A.** (see Kinsey, B. B.)—723(L)
**Bashkin, S., B. Petree, F. P. Mooring, and R. E. Peterson.** Total neutron scattering cross section of helium—748(A)
**Bates, D. R.** Electron recombination in helium—718(L)
**Bay, Z.** Calculation of decay times from coincidence experiments—419(L)
—— **and M. M. Slawsky.** General relation between genuine and chance coincidences and its application to measurement of high activity sources—414(L)
**Beams, J. W.** (see Snoddy, Leland B.)—572(T)
**Becker, John W.** Problems in newer fields in fluid mechanics—572(T)
**Becker, M. and H. Y. Fan.** Infra-red transmission of germanium and silicon—760(A)
**Beeman, W. W.** (see Dexter, D. L.)—761(A)
**Beghian, L. E., M. A. Grace, G. Preston, and H. Halban.** Inelastic scattering of neutrons by light nuclei—286(L)
**Beiduk, F. M.** (see Pruett, J. R.)—628, 755(A)
——, **J. R. Pruett, and E. J. Konopinski.** Theory of the D+D reactions. Part I. Analysis of the energy dependence—622, 755(A)
**Belinfante, F. J. and J. S. Lomont.** Interaction representation of general fields—757(A)
**Bell, P. R. and J. M. Cassidy.** Beta-spectrum of $Be^{10}$—301(L)
—— **and J. M. Cassidy.** Gamma-rays of $K^{40}$—409(L)
——, **Boyd Weaver, and J. M. Cassidy.** Beta-rays of $K^{40}$—399(L)
**Bendt, P. J. and I. W. Ruderman.** New method for determining the relative phase with which slow neutrons are scattered by nuclei—575
**Bene, G. J., P. M. Denis, and C. R. Extermann.** Upper limit of spin-spin interaction factor—288(L)
**Benfield, A. E.** D.c. magnetic generator—424(A)
—— New piezoelectric effect—762(A)
**Bennett, F. D.** (see Giese, J. H.)—574(A)
**Bennett, W. E.** (see Bradford, C. E.)—753(A)
**Bergdolt, V. E.** (see Giese, J. H.)—574(A)
**Berger, Martin J.** (see Groetzinger, Gerhart)—584
—— (see Ribe, Fred L.)—760(A)
**Bergström, I.** (see Grotdal, T.)—296(L)
——, **S. Thulin, and G. Andersson.** On the isomerism of $Kr^{83}$—851(L)
**Berman, A., P. Kusch, and A. K. Mann.** On the hyperfine structure of the $^2P_{\frac{1}{2}}$ state of $Tl^{205}$ and $Tl^{203}$—140(L)
**Berne, E.** Half-life of $Br^{82}$—568(L)
**Bernstein, Richard B.** (see Ferigle, Salvador M.)—740(A)
—— (see Madigan, John R.)—740(A)
**Bernstein, William** (see Miller, Warren W.)—714(L)
**Bershader, D. and S. I. Pai.** On turbulent jet mixing in two-dimensional supersonic flow—574(A)
**Bess, L.** Bremsstrahlung for heavy elements at extreme relativistic energies—550
**Bethe, H. A.** (see Levinger, J. S.)—756(A)
——, **L. M. Brown, and J. R. Stehn.** Numerical value of the Lamb shift—370
—— **and Conrad Longmire.** Effective range of nuclear forces. II. Photo-disintegration of the deuteron—647
**Bhabha, H. J.** On a new theory of nuclear forces—665
**Binder, Daniel.** Delayed coincidence counting measurement of $Hg^{203,205}$—291(L)
**Birnbaum, George.** Dispersion in $NH_3$ in the microwave region—144(L)
**Bishop, A. S.** (see Bradner, Hugh)—462
**Bishop, G. R., Richard Wilson, and H. Halban.** Measurement of some weak $\gamma$-ray intensities—416(L)
**Bjorklund, R., W. E. Crandall, B. J. Moyer, and H. F. York.** High energy photons from proton-nucleon collisions—213

—— *S*-matrix in non-local field theory—849(L)

**Zietlow, James P., Forrest F. Cleveland, and Arnold G. Meister.** Raman spectrum and force constants for fluorotrichloromethane—739(A)
**Zünti, W.** (see Frauenfelder, H.)—557(L)

PHYSICAL REVIEW VOLUME 77, NUMBER 6 MARCH 15, 1950

# Analytic Subject Index to Volume 77

References with (A) are to abstracts of papers presented at meetings of the American Physical Society, References with (L) are to Letters to the Editor.

**Absorption of radiation**
Infra-red in Si, H. B. Briggs—727(L)
Infra-red transmission of Ge and Si, M. Becker and H. Y. Fan—760(A)
In $N_2$, vacuum ultraviolet, G. L. Weisler and E. I. Mohr—741(A)
By water vapor in near infra-red, Robert M. Chapman—741(A)
**Alloys** (see **Crystalline states**)
**Annihilation radiation** (see **Radiation**)
**Astrophysics**
Infra-red spectrum of polar aurora, W. Petrie—720(L)
Oxygen in upper atmosphere, Rudolf Penndorf—561(L)
**Atmospheric electricity** (see **Meteorology**)
**Atomic structure** (see also **Energy states of atoms; Spectra**)
From diffraction studies, H. Hauptman and J. Karle—491
Electron screening, ionization potentials, Wolfgang Finkelnburg and Frank Stern—303(L)
**Aurora**
Oxygen in upper atmosphere, Rudolf Penndorf—561(L)

**Biophysics**
Color assignment, wave-length ranges, Zaboj V. Harvalik and John H. Bowel—745(A)
Electron-beam tumor therapy, W. H. Bostick—564(L)
Fast neutron detector, W. G. Moulton and C. W. Sherwin—758(A)
**Bremsstrahlung** (see **Radiation**)
**Broadening of spectral lines**
Microwave line widths, temperature dependence, Raydeen Howard and William V. Smith—840(L)
In microwave spectra, L. C. Jones—741(A)

**Conductivity, electrical** (see **Electrical conductivity; Discharge of electricity in gases**)
**Constants, physical standards**
Faraday constant, Jesse W. M. DuMond—411(L)
**Cosmic radiation**
Asymmetry of positive and negative mesons, Gerhart Groetzinger and Gordon W. McClure—777
Charged heavy meson, H. H. Forster—733(L)
Disintegrations at geomagnetic equator, J. A. Simpson, Jr. and E. Hungerford—847(L)
Disintegrations in emulsions in stratosphere, J. J. Lord and Marcel Schein—19
Distribution of photons in showers, G. Molière—715(L)
East-west asymmetry, Gerhart Groetzinger and Gordon W. McClure—751(A)
Gamma-rays, neutral meson decay, B. P. Gregory, B. Rossi, and J. H. Tinlot—299(L)
Heavy nuclei, H. L. Bradt and B. Peters—54
Heavy nuclei, energy spectrum, M. S. Vallarta—419(L)
Heavy primaries, Phyllis Freier, E. P. Ney, and F. Oppenheimer—752(A)
Interactions at 3260 meters, W. W. Brown and A. S. McKay—342
Knock-on secondaries of mesons, Frank L. Hereford—559(A)
Low ionizing radiation at great depths, M. Miesowicz, L. Jurkiewicz, and J. M. Massalski—380
Mesons at 11,300 ft., O. Piccioni—1
Mesons in atmosphere, Matthew Sands—180
Mesons, mass and charge sign in nuclear plates, Ian Barbour—751(A)
Minimum ionizing particles from disintegrations, B. T. Feld, I. L. Lebow, and L. S. Osborne—731(L)
Multiple production of mesons, Phyllis Freier and E. P. Ney—337; E. P. Ney and Phyllis Freier—752(A)
Neutron density at 100,000 ft., Luke C. L. Yuan—728(L)
Neutron production at high altitudes, J. A. Simpson, H W. Baldwin, and S. Molner—751(A)
Nuclear explosions, mean free path of particles, A. Lovati, A. Mura, G. Salvini, and G. Tagliaferri—284
Penetrating showers at 3260 meters, William D. Walker—686
Near Pfotzer maximum, S. F. Singer—730(L)
Potential gradient in atmosphere, S. A. Korff—144(L); Robert E. Holzer—846(L)
Primary $\alpha$-particle flux, L. Goldfarb, H. L. Bradt, and B. Peters—751(A)
Primary intensity at high altitudes, solar magnetic field, M. A. Pomerantz—830
Protons from absorption of $\pi$-mesons, Stephen Tamor—412(L)
Secondary particles of penetrating showers, O. Piccioni—6
Solar origin, H. Alfvén—375
Underground cloud-chamber study, O. L. Tiffany and W. E. Hazen—849(L)
Zenith angle dependence, S. F. Singer—729(L)
Zenith angle of air showers, H. L. Kraybill—410(L)
Zenith angle variation of latitude effect, H. D. Rathgeber—566(L)
**Cosmology**
Rotational universe, C. Y. Fan—140(L)
**Cross section, measurements, theory** (see also **Scattering of electrons, neutrons, and ions**)
Of $A^{36}$, thermal neutron-capture, G. E. McMurtrie and D. P. Crawford—840(L)

Of C, O, Mg, Si, and S for neutrons, G. D. Freier, E. E. Lampi, and J. H. Williams—748(A)
Of $C^{12}(p,\gamma)N^{13}$ reaction, low energies, Carl L. Bailey and William R. Stratton—194
Of $C^{12}(p,\gamma)N^{13}$ reaction near 100 kev, Robert Noel Hall and William Alfred Fowler—197
Coherent scattering of neutrons, M. Hamermesh—140(L)
Of Cu, Ni, Mn for slow neutrons, P. J. Bendt and I. W. Ruderman—575
$Cu^{63}(n,2n)Cu^{62}$, near threshold, J. L. Fowler and J. M. Slye, Jr.—787
$D(d,p)$ reaction, low energies, angular distribution, J. H. Sanders, J. Moffatt, and D. Roaf—754(A)
Of He for neutrons, S. Bashkin, B. Petree, F. P. Mooring, and R. E. Peterson—748(A)
For $He^3(d,p)He^4$ at 10.2-Mev, excited state in $He^4$, J. C. Allred—753(A)
Of high energy pi-mesons, Kenneth Greisen—713(L)
Of liquid S, Pb, and Bi for neutrons, Owen Chamberlain—305
$(n,2n)$, $(n,p)$ reactions, Bernard L. Cohen—754(A)
Neutron inelastic scattering by light nuclei, L. E. Beghian, M. A. Grace, G. Preston, and H. Halban—286(L)
For neutrons, mass number, R. K. Adair—748(A)
For 95 Mev neutrons, twelve elements, James DeJuren and Norman Knable—606
Photo-disintegration of rhodium, N. W. Curtis, J. Hornbostel, D. W. Lee, and E. O. Salant—290(L)
Of $K$, fast neutrons, R. E. Peterson—747(A)
Production of $Li^8$ from various gases, S. Courtenay Wright—742(A)
For resonance radiation scattering in Pb, Ralph Dressel, M. Goldhaber, and A. O. Hanson—754(A)
Scattering cross sections, properties of nuclear reaction, T. Teichmann—506
Slow neutron scattering in resonance region, J. Tittman, C. Sheer, J. Rainwater, and W. W. Havens—748(A)
Of various elements for thermal neutrons, H. Pomerance—747(A)

**Crystal structure**
Cation distribution in ferrites with spinel structure, Frank G. Brockman—841(L)
CoPt crystals, partially ordered, John B. Newkirk and R. Smoluchowski—749(A)
Electron reflection in diamond, R. D. Heidenreich—271

**Crystalline state**
Activation energy for motion of dislocations in Cu crystals, A. S. Nowick—750(A)
Band structure in disordered alloys, Hubert M. James and Arthur S. Ginzbarg—749(A)
Color centers in $CaF_2$ and $BaF_2$, Alexander Smakula—408(L)
Conductivity, effect of cold work, J. K. Mackenzie and E. H. Sondheimer—264
Conductivity in diamond, Kenneth G. McKay—816
Creep of Cu and Pb, single crystals, Peter W. Neurath and J. S. Koehler—750(A)
Crystals grown from vapor onto mica, L. G. Schulz—750(A)
Diamond conduction counter, effect of light, R. K. Willardson and G. C. Danielson—300(L)
Dielectric breakdown in non-polar crystals, W. R. Heller—760(A)
Dielectric characteristics, $CaF_2$ layers, Erkki A. Laurila—405(L)
Dielectric polarization in alkali-halide crystals, Shepard Roberts—258
Elastic constants of nickel crystals, Mikio Yamamoto—566(L)
Electrostatic potential energy from diffraction data, William J. Taylor—763(A)
Energy absorbed in twinning, zinc, Edward I. Salkovitz and James S. Koehler—749(A)
Energy bands and mobilities in monatomic semiconductors, W. Shockley and J. Bardeen—407(L)
Hall effect in Ge-Sb alloys, G. L. Pearson, J. D. Struthers, and H. C. Theurer—809
Internal friction at high temperatures, T'ing-Sui Kê—750(A)
Internal friction, measurement, J. S. Koehler and J. W. Marx—749(A)
Internal friction of copper, effects of etching, annealing, threshold deformation, J. W. Marx and D. A. Patterson—749(A)
Mobility of electrons and holes in Ge, W. C. Dunlap, Jr.—759(A)
Order in alloys, theory of, J. M. Cowley—669
Paramagnetic anisotropy of $MnF_2$, J. W. Stout and Maurice Griffel—750(A)
Piezoid characteristics, cylindrical shape, Charles R. Mingins, Carl A. Stevens, and Robert W. Perry—762(A)
Reflectivity of Ge alloys, K. Lark-Horovitz and K. W. Meissner—759(A)
Resistivity at boundaries between crystallites, V. A. Johnson—760(A)
Scintillations in KI, effect of Th impurity, M. Freedman, B. Smaller, and J. May—759(A)
Thermoelectric power and carriers in Se, Herbert W. Henkels—734(L)
Thermoluminescence of $CaSO_4$: Mn phosphor, K. Watanabe—748(A)
X- and $\gamma$-ray reflection properties of quartz, D. A. Lind, W. J. West, and J. W. M. DuMond—475
Zn alloys, magnetic properties at low temperatures, Jules A. Marcus—750(A)

**Dielectric constants** (see **Dielectrics and dielectric properties**)

**Dielectrics and dielectric properties**
Breakdown in non-polar crystals, W. R. Heller—760(A)
Of $CaF_2$ layers, Erkki A. Laurila—405(L)
Of ferromagnetic ferrite, dimensional effects, Frank G. Brockman, P. H. Dowling, and Walter G. Steneck—85
Polarization in alkali-halide crystals, Shepard Roberts—258

**Discharge of electricity in gases**
Coulomb interactions in plasma, L. Landau—567(L)
Drift velocities in A, N, A-N mixtures, E. D. Klema and J. S. Allen—661
Extraction of ions from solids, pitting, Jerome Rothstein—744(A)
Photon pulses, point-to-plane corona, W. N. English—850(L)
Radiation transients, R. G. Fowler—760(A)
Recombination and electron density in Ne afterglows, R. B. Holt, John M. Richardson, B. Howland, and B. T. McClure—239
Retardation of ions, A. J. Dempster and A. E. Shaw—746(A)
Spurious parallel plate counters, Frank L. Hereford—559(L)

**Disintegration and excitation of nucleus** (see also **Radioactivity**)
Absolute voltage determinations, comparison of, William J. Sturn and Virgil Johnson—752(A)
$\alpha$-particles from F and Li, W. E. Burcham and Joan M. Freeman—287(L)
Angular correlation of internal conversion electrons, H. Frauenfelder, M. Walter, and W. Zünti—557(L)
Angular distribution of $D(d,p)$, low energy cross section, J. H. Sanders, J. Moffat, and D. Roaf—754(A)
Angular distribution of protons from $O^{16}(d,p)O^{17}$, Leo Diesendruck—753(A)

**Disintegration and excitation of nucleus** (continued)
$C^{12}(p,\gamma)N^{13}$ reaction at low energies, Carl L. Bailey and William R. Stratton—194; Robert Noel Hall and William Alfred Fowler—197
$Cu^{63}(n,2n)Cu^{62}$, near threshold, J. L. Fowler and J. M. Slye, Jr.—787
D+D reactions, energy dependence, F. M. Beiduk, J. R. Pruett, and E. J. Konopinski—622, 755(A)
D+D reactions, internucleonic forces, J. R. Pruett, F. M. Beiduk, and E. J. Konopinski—628, 755(A)
$D(p,n)2H$ threshold, D binding energy, R. V. Smith and D. H. Martin—752(A)
Of deuterons by neutrons, G. L. Griffith, M. E. Remley, and P. G. Kruger—748(A)
Deuterons from high energy reactions, G. F. Chew and M. L. Goldberger—470
Excited state in $He^4$, search for, J. C. Allred—753(A)
Excited state of $Be^7$, T. A. Hall—411(L); J. C. Grosskreutz and K. B. Mather—580, 747(A)
Gamma-rays from neutron capture by Be, C, and N, B. B. Kinsey, G. A. Bartholomew, and W. H. Walker—723(L)
General properties, scattering cross sections, T. Teichmann —506
Of $He^3$ and $N^{14}$ by thermal neutrons, reaction energies, W. Franzen, J. Halpern, and W. E. Stephens—641
High voltage scale, H. T. Richards and R. V. Smith—752(A)
Of $Mg^{24}(p,\gamma)Al^{25}$ resonances, T. Grotdal, O. M. Lönsjö, R. Tangen, and I. Bergström—296(L)
*N-P* reactions in light elements, C. P. Browne, R. V. Smith, and H. T. Richards—754(A)
Neutrons from Be, W. D. Whitehead and C. E. Mandeville —732(L)
Neutrons from $Li^7(p,n)Be^7$, V. R. Johnson, M. J. Wilson Laubenstein, and H. T. Richards—413(L)
Pairs and gamma-radiation of $O^{16}$, V. K. Rasmussen, W. F. Hornyak, C. C. Lauritsen, and T. Lauritsen—617
$(p,\gamma)$ resonances below 400 kv, S. K. Allison, J. H. Montague, and A. H. Morrish—754(A)
Spallation products of arsenic with 190-Mev deuterons, H. H. Hopkins, Jr.—717(L)
Stars in $O_2$ and He produced by 90-Mev neutrons, James Tracy and Wilson M. Powell—594

**Elasticity**
Of Be crystals, Louis Gold—390
Constants of nickel crystals, Mikio Yamamoto—566(L)
Free vibrations of isotopic cube, T. Schiffman and H. Ekstein—757(A)
Of Ti rod, Herbert I. Fusfeld and Joseph T. Gilbert—302(L)
**Electrical conductivity and resistance**
Conductivity pulses in liquids, Norman Davidson and A. E. Larsh, Jr.—706
In diamond, electron bombardment, Kenneth G. McKay—816
Effect of cold work, J. K. Mackenzie and E. H. Sondheimer —264
Energy bands and mobilities in monatomic semiconductors, W. Shockley and J. Bardeen—407(L)
Of Ge in external magnetic fields, A. Foner and I. Estermann—759(A)
Ge rectifier, effect of frequency, R. Bray and H. J. Yearian—760(A)
Impurity scattering in semiconductors, E. Conwell and V. F. Weisskopf—388
Mobility of electrons and holes in Ge, W. C. Dunlap, Jr.—759(A)
*n*- and *p*-germanium transistors, electrical forming, J. Bardeen and W. G. Pfann—401(L)
Non-linear I–V characteristic of Ge at low *T*, F. K. du Pré—152(L); Erratum—571(L)
Of polycrystalline graphite, S. Mrozowski—838(L)
Resistivity at boundaries between crystallites, V. A. Johnson—760(A)
Of Si, erratum, G. L. Pearson and J. Bardeen—303(L)
Space-charge effects, diamond conduction counters, R. K. Willardson, A. C. Damask, and G. C. Danielson—758(A)
Surface impedance of Sn, Hg, and Pb, I. Šimon—384
Transistor characteristics, type *A*, L. P. Hunter—558(L)
**Electrodynamics** (see **Electromagnetic theory**)
**Electromagnetic theory** (see also **Quantum electrodynamics**)
Electron dynamics in standing wave accelerator, Gerald Hoffman and Edward Akeley—761(A)
Elimination of self-electromagnetic field, Stuart P. Lloyd—757(A)
Motion of a charge in magnetic field, M. H. Johnson and B. A. Lippmann—702
Motion of particles in linear accelerator, John R. Terrall—415(L)
New theory of electricity, Bayard P. Peakes—424(A)
Waves in ionized media, sun's atmosphere, V. A. Bailey—418(L)
**Electron diffraction**
"Forbidden" reflection in diamond, R. D. Heidenreich—271
**Elements**
Berkelium $97^{244}$, S. G. Thompson, A. Ghiorso, and G. T. Seaborg—838(L)
**Energy states of nucleus** (see **Disintegration and excitation of nucleus; Nuclear structure**)
**Errata**
Electrical properties of pure silicon and silicon alloys, G. L. Pearson and J. Bardeen—303(L)
Microwave spectrum of $CH_2CFCl$, J. K. Bragg, T. C. Madison, and A. H. Sharbaugh—571(L)
Non-linear I–V characteristic of Ge at very low temperatures, F. K. du Pré—571(L)
Quasi-chemical method in the statistical theory of regular mixtures, Yin-Yuan Li—300(L)
Short range alpha-particles from fluorine and lithium bombarded by protons, W. E. Burcham and Joan M. Freeman—287(L)
Theory of pressure absorption, Masataka Mizushima—149(L)
**Excitation of nuclei** (see **Disintegration and excitation of nucleus; Nuclear structure**)

**Field theory** (see also **Quantum electrodynamics**)
Coupling of gravitational and electronic fields, Hermann Weyl—699
Field dynamics, *S*-matrix, K. V. Roberts—146(L)
Interaction Hamiltonian, classical, K. V. Roberts—146(L)
Non-local free fields, Hideki Yukawa—219, 849(L)
Representation of general fields, F. J. Belinfante and J. S. Lomont—757(A)
**Fission of nucleus** (see also **Disintegration and excitation of nucleus**)
Photo-fission thresholds in U, Pu, and Th, H. W. Koch, J. McElhinney, and E. L. Gasteiger—329
Yields, closed-shell perturbations, interpretations, L. E. Glendenin and C. D. Coryell—755(A)
Yields of 65*d* $Zr^{95}$ and 17*h* $Zr^{97}$, search for other chains, C. D. Coryell, A. Y. Sakakura, and A. M. Ross—755(A)
**Flame phenomena**
Flame structure, Raymond Friedman and Edward Burke—574(A)
Turbulent flames, Bela Karlovitz—574(A)
**Fluid dynamics** (see also **Hydrodynamics; Aerodynamics**)
Bernoulli's theorem for viscous compressible fluids, C. Truesdell—535
Oscillations of a cable in a stream, A. E. Seigel—573(A)
Virtual mass of a sphere, Albert May and Jean C. Woodhull —573(A)

**Friction**
Activation energy for motion of dislocations in Cu crystals, A. S. Nowick—750(A)
Internal friction at high temperatures, T'ing-Sui Kê—750(A)
Internal friction in Ti rod, Herbert I. Fusfeld and Joseph T. Gilbert—302(L)
Internal friction, measurement, J. S. Koehler and J. W. Marx—749(A)
Internal friction of copper, effects of etching, annealing, threshold deformation, J. W. Marx and D. A. Patterson—749(A)

**Gamma-rays** (see also **Disintegration and excitation of nucleus; Radioactivity**)
Angular correlation of annihilation radiation, S. De-Benedetti, C. E. Cowan, W. R. Konneker, and H. Primakoff—205
High energy photons from proton-nucleon collisions, R. Bjorklund, W. E. Crandall, B. J. Moyer, and H. F. York—213
From $N^{16}$, energies measured, C. H. Millar, A. G. W. Cameron, and M. Glicksman—742(A)
From $O^{16}$, V. K. Rasmussen, W. F. Hornyak, C. C. Lauritsen, and T. Lauritsen—617
Selection rules for disintegration into two photons, C. N. Yang—242

**Geophysics**
Earth's magnetic field at high altitudes, S. F. Singer, E. Maple, and W. A. Bowen, Jr.—398(L)

**Hall effect**
In Ge-Sb alloys, measurements, G. L. Pearson, J. D. Struthers, and H. C. Theurer—809

**Hydrodynamics**
Diabatic flow, Bruce L. Hicks—286(L)
Direction-of-fall of sedimenting particles, E. E. Miller and C. B. Tanner—761(A)
Eddy viscosity in isotropic turbulence, T. D. Lee—842(L)

**Hyperfine structure** (see also **Nuclear moments and spin**)
Of Ba, isotope shift, O. H. Arroe—745(A)
Of deuterium, Francis Low—361
Electron spin, gyromagnetic ratio, A. K. Mann and P. Kusch—435
Exchange narrowing of paramagnetic resonance, C. H. Townes and J. Turkevich—148(L)
Of heavy elements, influence of nuclear structure, Aage Bohr and V. F. Weisskopf—94
Of In stable isotopes, interaction constants, A. K. Mann and P. Kusch—427
Quadrupole effects in solids, C. Kikuchi—746(A)
Of $Tl^{205}$ and $Tl^{203}$, $^2P_{\frac{1}{2}}$ state, A. Berman, P. Kusch, and A. K. Mann—140(L)

**Instruments** (see Methods and instruments)

**Ionization**
In air and $A$ by $\pi$-particles, William P. Jesse, Harold Forstat, and John Sadauskis—782
Waves in ionized media, V. A. Bailey—418(L)

**Ionization potentials**
Of higher atomic ions, Wolfgang Finkelnburg—304(L)
Of neutral and singly ionized atoms, electron screening, Wolfgang Finkelnburg and Frank Stern—303(L)

**Ionosphere**
Ionospheric phenomena and surface pressure, M. W. Jones and J. G. Jones—845(L)

**Isomers, nuclear** (see also **Nuclear structure; Radioactivity**)
Of $_{79}Au^{197}$, F. K. McGowan—138(L)
Of $Kr^{83}$, I. Bergström, S. Thulin, and G. Andersson—851(L)
Of RaE, H. M. Neumann, J. J. Howland, Jr., and I. Perlman—720(L)

**Isotopes**
Abundance ratios, C, N, O, A, and K, Alfred O. Nier—789
Of Cs, neutron-deficient activity of, Richard W. Fink, Frederick L. Reynolds, and D. H. Templeton—614
Concentration of $Be^{10}$, C. P. Keim, H. W. Savage, and Boyd Weaver—414(L)
Of Er and Lu, Richard J. Hayden, David C. Hess, Jr., and Mark G. Inghram—299(L)
Heavy odd-odd isotopes, A. Broniewski—846(L)
Of Sc, Gd, Dy, Ho, Er, and Yb, Wallace T. Leland—634

**Liquids** (see also **Hydrodynamics**)
Phase relations in $He^3$-$He^4$, B. Weinstock, D. W. Osborne, and B. M. Abraham—400(L)
Phase transition, mixtures of $He^3$ and $He^3$, C. J. Gorter and J. de Boer—569(L)
Structure from neutron diffraction, Owen Chamberlain—305

**Low temperature phenomena**
$\lambda$-point of $He^4$, effect of $He^3$, O. K. Rice—142(L)
Neutron scattering by liquid helium, L. Goldstein, D. Sweeney, and M. Goldstein—319
Non-linear I-V characteristic of Ge, F. K. du Pré—152(L); Erratum—571(L)
Specific heats of W and Zn, low temperatures, A. A. Silvidi and J. G. Daunt—125

**Luminescence**
Of barium oxide, Virgil L. Stout—744(A)

**Magnetic properties** (see also **Nuclear moments and spin**)
Of Alnico V, C. Kittel, E. A. Nesbitt, and W. Shockley—839(L)
Coercive force *vs.* temperature, J. K. Galt—845(L)
Exchange interaction on absorption, C. Kittel and Conyers Herring—725(L)
Of ferromagnetic ferrite, dimensional effects of dielectric constants, Frank G. Brockman, P. H. Dowling, and Walter G. Steneck—85
Paramagnetic anisotropy of $MnF_2$, J. W. Stout and Maurice Griffel—750(A)
Single domains in fine powders, C. Kittel, J. K. Galt, and W. E. Campbell—725(L)
Of Zn alloys at low temperatures, Jules A. Marcus—750(A)

**Magnetic resonance absorption** (see also **Nuclear moments and spin**)
Dependence on chemical compound, W. G. Proctor and F. C. Yu—717(L); W. C. Dickinson—736(L)
Effect of electronic paramagnetism, W. D. Knight—746(A); C. H. Townes, Conyers Herring, and W. D. Knight—852(L)
Electron spin gyromagnetic ratio, A. K. Mann and P. Kusch—435
Exchange interaction on absorption, C. Kittel and Conyers Herring—725(L)
Exchange narrowing of paramagnetic resonance, C. H. Townes and J. Turkevich—148(L)
$g$-values in paramagnetic organic compounds, A. N. Holden, C. Kittel, F. R. Merritt, and W. A. Yager—147(L)
Hyperfine structure of In stable isotopes, interaction constants, A. K. Mann and P. Kusch—427
Hyperfine structure of $Tl^{205}$ and $Tl^{203}$, $^2P_{\frac{1}{2}}$ state, A. Berman, P. Kusch, and A. K. Mann—140(L)
Of magnesium ferrites, A. J. E. Welch, P. F. Nicks, Alan Fairweather, and F. F. Roberts—403(L)
In Mo Permalloy, Junkichi Itoh and Tetsuo Akioka—293(L)
Nuclear induction, free Larmor precession, E. L. Hahn—297(L)
Spin echoes, E. L. Hahn—746(A)
Spin-spin interaction factor, upper limit, G. J. Bene, P. M. Denis, and C. R. Extermann—288(L)

**Mass spectroscopy** (see also **Isotopes**)
Doublet measurements, T. R. Roberts and Alfred O. Nier—746(A)
**Mean or half-life**
Of $Au^{197}$, $Fe^{57}$, $Cd^{111}$, $Hg^{198}$, and $Tl^{203}$, excited states, Martin Deutsch and W. E. Wright—139(L)
Half-life of $\gamma$-decay of $Hg^{203,205}$, Daniel Binder—291(L)
Of positive $\pi$-meson, E. A. Martinelli and W. K. H. Panofsky—465
Of $U^{238}$, double beta-decay, C. A. Levine, A. Ghiorso, and G. T. Seaborg—296(L)
**Mechanics, quantum—atomic structure and spectra**
Lamb shift, numerical value, H. A. Bethe, L. M. Brown, and J. R. Stehn—370
**Mechanics, quantum—general**
Dissipative systems, Wesley E. Brittin—396
Equations of motion and commutation relations, Eugene P. Wigner—711
Higher order equations, W. Thirring—570(L)
*S*-matrix and Hamiltonian, H. Ekstein—757(A)
Two-component wave equations, F. Gürsey—844(L)
Upper and lower bounds of eigenvalues, Tosio Kato—413(L)
Vector-matrices and their spurs, R. J. Duffin—683
**Mechanics, quantum—molecular structure and spectra**
*l*-type doubling of methyl cyanide and methyl iso-cyanide, Harald H. Nielsen—130
**Mechanics, quantum—nuclear**
Bremsstrahlung for heavy elements, relativistic energies, L. Bess—550
D+D reactions, energy dependence, F. M. Beiduk, J. R. Pruett, and E. J. Konopinski—622
D+D reactions, internucleonic forces, J. R. Pruett, F. M. Beiduk, and E. J. Konopinski—628
Hyperfine structure of deuterium, internal motion effects, Francis Low—361
Multiple meson processes, Alex E. S. Green—719(L)
*n-p* interaction, Richard S. Christian and Edward W. Hart—441
Relativistic nuclear force, T. Toyoda—853(L)
**Mechanics, statistical**
Distribution of phases in two-phase solids, Leonard D. Jaffe—762(A)
Thermodynamic functions of crystals, William J. Taylor—762(A)
Of three-dimensional ferromagnet, D. ter Haar and B. Martin—721(L)
Vibrational relaxation times in polyatomic gases, R. N. Schwartz—572(A)
**Mesons** (see also **Cosmic radiation**)
Annihilation radiation, selection rules, C. N. Yang—242
Artificially produced, electrical detection, L. W. Alvarez, A. Longacre, V. G. Ogren, and R. E. Thomas—752(A)
Asymmetry in cosmic rays, Gerhart Groetzinger and Gordon W. McClure—777
Charged heavy meson, H. H. Forster—733(L)
Cross sections of high energy pi-mesons, Kenneth Greisen—713(L)
Disintegration products, 2.2-$\mu$sec. meson, E. P. Hincks and B. Pontecorvo—102
East-west asymmetry, Gerhart Groetzinger and Gordon W. McClure—751(A)
Gamma-rays from neutral meson, B. P. Gregory, B. Rossi, and J. H. Tinlot—299(L)
Generalized meson theories, Alex E. S. Green—755(A)
Lifetime of positive $\pi$-meson, E. A. Martinelli and W. K. H. Panofsky—465
Low energy in atmosphere, Matthew Sands—180
Mass and charge sign in nuclear plates, Ian Barbour—751(A)
Moderation in hydrogen, A. S. Wightman—521
Multiple processes, Alex E. S. Green—719(L)
Multiple production, Phyllis Freier and E. P. Ney—337; E. P. Ney and Phyllis Freier—752(A)
Neutral meson, scalar or pseudoscalar, C. N. Yang—722(L)
Produced by neutrons, F. M. Smith, Eugene Gardner, and Hugh Bradner—562(L)
Production at 11,300 ft., O. Piccioni—1
Relativistic meson theory of deuteron, S. M. Dancoff—755(A)
Spin of $\pi$-meson, B. Ferretti and S. Gallone—153(L)
Vector mesons, processes, James N. Snyder—143(L)
**Metals** (see **Crystalline state**)
**Meteorology** (see also **Ionosphere**)
Electrical potential on freezing of water, Vincent J. Schaefer—721(L)
Potential gradient in atmosphere, cosmic radiation, Robert E. Holzer—846(L)
**Methods and instruments**
Absorption data analysis, maximum $\beta$-ray energy from $Cu^{62}$, L. Katz, A. S. Penfold, H. J. Moody, R. N. H. Haslam, and H. E. Johns—289(L)
Active coaxial tube, Philippe A. Clavier—302(L)
Anthracene counter, response to monoenergetic electrons, John I. Hopkins—406(L); James F. Norton—759(A)
Calorimetry of solids, Malcolm Dole, John A. Wethington, Jr., Norman Larson, and W. P. Hettinger, Jr.—761(A)
Cathode-ray tube and photo-cell to synthesize integral d.c. voltages, H. P. Stabler—423(A)
Coaxial lines, short time delays, Donald C. Moore and Willard A. Reenstra—761(A)
Coincidences, high activity sources, Z. Bay and M. M. Slawsky—414(L)
Conductivity in diamond under electron bombardment, multiple pulses, Kenneth G. McKay—816
Conductivity pulses in liquids, ionizing radiations, Norman Davidson and A. E. Larsh, Jr.—706
Crystals grown from vapor, L. G. Schulz—750(A)
D.c. magnetic generator, A. E. Benfield—424(A)
Decay times from coincidence experiments, Z. Bay—419(L)
Diamond conduction counter, effect of light, R. K. Willardson and G. C. Danielson—300(L)
Diamond conduction counters, space-charge effects, R. K. Willardson, A. C. Damask, and G. C. Danielson—758(A)
Drift velocities of electrons in A, N, A-N mixtures, E. D. Klema and J. S. Allen—661
Electron-beam tumor therapy, W. H. Bostick—564(L)
Emission regulator for mass spectrometer, E. B. Winn and Alfred O. Nier—746(A)
Equivalent circuit of piezoelectric resonators, Karl S. Van Dyke, Edward A. Pendleton, and Gary D. Gordon—424(A)
Fast neutron detector, health physics, W. G. Moulton and C. W. Sherwin—758(A)
Fast neutron energies measured in photographic emulsions, George R. Keepin, Jr. and James H. Roberts—758(A)
Gamma-scintillations in diphenylacetylene, C. F. Ravilious, J. O. Elliot and S. H. Liebson—851(L)
Illinois cyclotron oscillator, G. F. Tape and P. G. Kruger—757(A)
Internal friction, J. S. Koehler and J. W. Marx—749(A)
Light-source high intensity exploding wires, William M. Conn—745(A)
Mass spectrograph ion retardation due to gas, A. J. Dempster and A. E. Shaw—746(A)
Mesons electrically detected, L. W. Alvarez, A. Longacre, V. G. Ogren, and R. E. Thomas—752(A)
Neutron detector, Pd film, B. R. Gossick—297(L)

Neutron diffraction in liquid structure studies, Owen Chamberlain—305
Nuclear absolute voltage determinations, comparison of, William J. Sturm and Virgil Johnson—752(A)
Nuclear high voltage scale, H. T. Richards and R. V. Smith—752(A)
Nuclear induction, free Larmor precession, E. L. Hahn—297(L)
Oxide cathodes, production of, L. T. Aldrich and C. E. Smith—744(A)
Particle size from sedimentation, E. E. Miller and C. B. Tanner—761(A)
Particle size from x-ray scattering data, D. L. Dexter and W. W. Beeman—761(A)
Particles in linear accelerator, John R. Terrall—415(L)
Phase in slow neutron scattering, P. J. Bendt and I. W. Ruderman—575
Pole tips on cyclotron, Martin Foss—758(A)
Proportional counter spectrometer, C. J. Borkowski and E. Fairstein—759(A)
Rectifier resistance dependence on frequency, R. Bray and H. J. Yearian—760(A)
Scintillation pulses in anthracene, temperature dependence, G. G. Kelley and M. Goodrich—138(L)
Scintillations in KI, effect of Th impurity, M. Freedman, B. Smaller, and J. May—759(A)
Scintillators for low energy electrons, Waldo Rall and R. G. Wilkinson—758(A)
Se rectifiers in 500-kev generator, W. R. Arnold—758(A)
Small curvatures by optical interference, Harold R. Letner—762(A)
Spurious parallel plate counters, Frank L. Hereford—559(L)
Standard sources for beta-disintegration, T. B. Novey—742(A)
Standing wave accelerator, electron dynamics in, Gerald Hoffman and Edward Akeley—761(A)
Thickness of films on coated cylinders, Eugene B. Hensley—744(A)
Transistor characteristics, type A, L. P. Hunter—558(L)
Ultrasonic interferometer for low acoustic impedance, James L. Stewart and Ellen S. Stewart—143(L)
Voltage stabilizer for electrostatic generator, W. C. Miller, B. Waldman, J. C. Noyes, and J. E. Van Hoomissen—758(A)
Xylene and argon counters, effect of rest, Besim Tanyel—843(L)

**Microwaves** (see also **Electromagnetic theory; Spectra, microwave**)
Hyperfine structure, exchange narrowing of paramagnetic resonance, C. H. Townes and J. Turkevich—148(L)

**Mobility of electrons**
Drift velocities in A, N, A-N mixtures, E. D. Klema and J. S. Allen—661

**Molecular structure and constants** (see also **Raman spectra; Spectra, molecular**)
Of $CBr_3D$, thermodynamic properties, Salvador M. Ferigle, Forrest F. Cleveland, William M. Boyer, and Richard B. Bernstein—740(A)
Of $CF_3Br$, $CF_3I$, and $CF_3CN$, interatomic distances, John Sheridan and Walter Gordy—292(L)
Of $CF_3Br$, microwave spectrum A. H. Sharbaugh, B. S. Pritchard, and T. C. Madison—302(L)
Of $CCl_3F$, James P. Zietlow, Forrest F. Cleveland, and Arnold G. Meister—739(A)
Of $CDCl_3$, thermodynamic properties, John R. Madigan, Forrest F. Cleveland, William M. Boyer, and Richard B. Bernstein—740(A)
Dipole moments, Stark effects in OCS, R. G. Shulman and C. H. Townes—500
Of FCl, microwave techniques, D. A. Gilbert and A. Roberts—742(A)
Of GaCl, vibrational structure, F. K. Levin and J. G. Winans—741(A)
Of HCN, microwave spectrum, James W. Simmons, Wallace E. Anderson, and Walter Gordy—77
Of HF and DF, infra-red absorption, Robert M. Talley, Hoyt M. Kaylor, and Alvin H. Nielsen—529
Of nitrosyl chloride, microwave techniques, W. J. Pietenpol, J. D. Rogers, and Dudley Williams—741(A)
Of trifluorosilane derivatives, John Sheridan and Walter Gordy—719(L)

**Moments, of particles** (see also **Nuclear moments and spin**)
Proton magnetic moment, diamagnetic field correction, Norman F. Ramsey—567(L)

**Neutrons**
From Be, W. D. Whitehead and C. E. Mandeville—732(L)
From $Be^9(\alpha,n)$ reaction, yield, energy, C. E. Bradford and W. E. Bennett—753(A)
Detector, Pd film, B. R. Gossick—297(L)
Elastic scattering at 84 Mev, A. Bratenahl, S. Fernbach, R. H. Hildebrand, C. E. Leith, and B. J. Moyer—597
At high altitudes, from C, Al, Cu, Sn, and Pb, J. A. Simpson, H. W. Baldwin, and S. Molner—751(A)
At 100,000 ft., Luke C. L. Yuan—728(L)
Phase and cross section in scattering, P. J. Bendt and I. W. Ruderman—575
Radioactive decay, J. M. Robson—747(A)
Resonance in Ag, W. Selove—557(L)
Scattering by liquid helium, L. Goldstein, D. Sweeney, and M. Goldstein—319
Spatial distributions, L. Secrest—141(L)
Total reflection, applications, M. Hamermesh—140(L)
Yield from thick targets, A. J. Allen, J. F. Nechaj, K. H. Sun, and B. Jennings—752(A)

**Neutron diffraction**
In liquid S, Pb, Bi, Owen Chamberlain—305

**Nuclear moments and spin** (see also **Hyperfine structure**)
Of Ba isotopes, O. H. Arroe—745(A)
Deuteron electrical quadrupole moment, G. F. Newell—141(L)
Of $Mg^{25}$, F. M. Kelly, A. L. Schawlow, W. M. Gray, and M. F. Crawford—745(A)
Magnetic resonance dependence on chemical compound, W. G. Proctor and F. C. Yu—717(L); W. C. Dickinson—736(L)
Of $Mn^{55}$, $Co^{59}$, $Cl^{37}$, W. G. Proctor and F. C. Yu—716(L)
Quadrupole effects in solids, C. Kikuchi—746(A)
Of $S^{35}$, quadrupole moment, Victor W. Cohen, Walter S. Koski, and T. Wentink, Jr.—742(A)
Of Xe isotopes, Jørgen Koch and Ebbe Rasmussen—722(L)

**Nuclear spectra** (see **Disintegration and excitation of nucleus; Radioactivity; Spectra, nuclear**)

**Nuclear structure** (see also **Disintegration and excitation of nucleus; Radioactivity; Spectra, nuclear**)
Beta-spectra of $Cl^{38}$, Lawrence M. Langer—50
Continuity principle applied to even *N*-odd *P* and odd *N*-even *P* nuclei, Martin Popelka and William D. Harkins—756(A)
D+D reactions, internucleonic forces, J. R. Pruett, F. M. Beiduk, and E. J. Konopinski—755(A)
Of deuteron and triton from h.f.s., Edward N. Adams, II—755(A)
Dipole vibrations and surface symmetry energy, R. D. Present—355
Excited states of $Be^7$, T. A. Hall—411(L); J. C. Grosskreutz and K. B. Mather—747(A)
Of $Au^{198}$ and $Rb^{86}$, $\beta$-$\gamma$-angular correlation, Sherman Frankel—747(A)

**Nuclear structure** (continued)
Influence on h.f.s. of heavy elements, Aage Bohr and V. F. Weisskopf—94
Isotope shift and nuclear polarization, G. Breit, G. B. Arfken, and W. W. Clendenin—569(L)
Low levels in $Li^7$ and $Be^7$, D. R. Inglis—724(L)
Magic numbers, continuity and regularity of nuclear series, William D. Harkins and M. Popelka—756(A)
Neutron core model, Hoff Lu—416(L)
Nuclear forces, theory of, H. J. Bhabha—665
Nuclear saturation, E. Gerjuoy—568(L)
Nuclear shell models, Eugene Feenberg—771
Potassium energy levels, Vance L. Sailor—794
Quadrupole moment of $Li^7$, C. H. Blanchard and R. Avery—756(A)
Range of nuclear force, *p-p*, *n-p* interactions, P. Swan—288(L)
Spherical shell nuclear model, H. A. Wilson—516

**Optical constants and properties**
Of Si and Ge, H. B. Briggs—287(L)

**Packing fraction** (see also **Isotopes**)
Of $Pt^{198}$, Howard A. Johnson, Henry E. Duckworth, Richard S. Preston, and Richard F. Woodcock—424(A)
Of $W^{188}$ and $W^{186}$, Richard F. Woodcock, Henry E. Duckworth, Richard S. Preston, and Howard A. Johnson—424(A)

**Pair production**
Nuclear impulse, G. E. Modesitt and H. W. Koch—175

**Photo-disintegration**
Of deuteron, 4- to 20-Mev radiation, Everett G. Fuller—752(A)
Of deuteron, use of range of forces in theory, H. A. Bethe and Conrad Longmire—647
Dipole transitions in nuclear photo-effect, J. S. Levinger and H. A. Bethe—756(A)
Of nitrogen, E. R. Gaerttner and M. L. Yeater—570(L)
Of N and O by 100-Mev x-rays, E. R. Gaerttner and M. L. Yeater—714(L)
Protons from $D^2(\gamma,n)H^1$, angular distribution, Gerson Goldhaber—753(A)
Protons from Mg, angular distribution, energy, M. E. Toms, J. Halpern, and W. E. Stephens—753(A)
Of Rh, N. W. Curtis, J. Hornbostel, D. W. Lee, and E. O. Salant—290(L)
Yields and angular distributions of neutrons, G. A. Price and D. W. Kerst—806

**Photoelectric effect and properties; cells**
Work function of Ag, effect of support, L. L. Blackmer and H. E. Farnsworth—826

**Piezoelectric effect**
Piezoid characteristics, cylindrical shape, Charles R. Mingins, Carl A. Stevens, and Robert W. Perry—762(A)
Potential gradient produced by stress gradient, A. E. Benfield—762(A)

**Plasticity**
Time delays, John Kauffman and Waller George—761(A)

**Proceedings of the American Physical Society**
New England Section, Williams College, Williamstown, Massachusetts, October 22, 1949—422
Chicago Meeting, Chicago, Illinois, November 25–26, 1949—737
Division of Fluid Dynamics, University of Virginia, Charlottesville, Virginia, December 28–30, 1949—572

**Quantum electrodynamics** (see also **Field theory**)
Charge conjugation in two-component wave equations, Herbert Jehle—757(A)
Elimination of self-electromagnetic field, Stuart P. Lloyd—757(A)
Interaction between elementary particles, Alfred Landé—814
Longitudinal field treatment, Ning Hu—150(L)
Longitudinal photons, F. J. Dyson—420(L)
Motion of a charge in magnetic field, M. H. Johnson and B. A. Lippmann—702
Radiative corrections, electron magnetic moment, Robert Karplus and Norman M. Kroll—536
Selection rules for annihilation radiation, C. N. Yang—242
Self-energy of particles, Suraj N. Gupta—294(L)
Self-stress of electron, F. Rohrlich—357

**Quantum mechanics** (see **Mechanics, quantum**)

**Radiation** (see also **Thermal radiation**)
Angular correlation of annihilation radiation, C. S. Wu and I. Shaknov—136(L); S. DeBenedetti, C. E. Cowan, W. R. Konneker, and H. Primakoff—205
Bremsstrahlung for heavy elements, relativistic energies, L. Bess—550

**Radioactivity** (see also **Disintegration and excitation of nucleus; Nuclear structure; Spectra, nuclear**)
$\alpha$-$\beta$- and $\alpha$-$K$-branching, W. Jentschke—98
Of $Be^7$, momentum relations, Philip B. Smith and James S. Allen—747(A)
Of $Be^{10}$, $\beta$-spectra, P. R. Bell and J. M. Cassidy—301(L); D. J. Hughes, C. Eggler, and D. E. Alburger—726(L)
Beta-particles from tritium, energy-distribution, E. P. Cooper and F. T. Rogers, Jr.—402(L)
Beta-ray spectra, effect of screening, John R. Reitz—10
Of $B^{12}$ and $Li^8$, beta-decay, W. F. Hornyak and T. Lauritsen—160
Of $Br^{82}$, half-life, E. Berne—568(L)
Of $Ca^{45}$, $\beta$-spectra, P. Macklin, L. Feldman, L. Lidofsky, and C. S. Wu—137(L)
Of C, half-life, Warren W. Miller, Robert Ballentine, William Bernstein, Lewis Friedman, A. O. Nier, and R. D. Evans—714(L)
Of $C^{15}$, Emmett L. Hudspeth, Charles P. Swann, and N. P. Heydenburg—736(L)
Of Cs, Richard W. Fink, Frederick L. Reynolds, and D. H. Templeton—614
Of $Cl^{38}$, $\beta$-spectra, Lawrence M. Langer—50, 742(A)
Of $Cu^{61}$, $\gamma$-radiation, F. Boehm, J. P. Blaser, P. Marmier, and P. Preiswerk—295(L)
Of $Cu^{61}$, positron spectrum, George E. Owen and C. Sharp Cook—743(A)
Of $Cu^{62}$, maximum $\beta$-ray energy, L. Katz, A. S. Penfold, H. J. Moody, R. N. H. Haslam, and H. E. Johns—289(L)
Of Eu, conversion electrons, J. M. Cork, H. B. Keller, W. C. Rutledge, and A. E. Stoddard—848(L)
Evaluation of $f_{\pm}(Z,W_0)$, Fermi beta-decay, George L. Trigg—756(A)
Fermi beta-decay, *ft* values, Eugene Feenberg—756(A)
Of Fr and Em, E. K. Hyde, A. Ghiorso, and G. T. Seaborg—765
Gamma-radiation from positron emitters, H. E. Kubitschek, A. Longacre, and M. Goldhaber—742(A)
Of $Au^{198}$ and $Rb^{86}$, $\beta$-$\gamma$ angular correlation, Sherman Frankel—747(A)
Of $He^6$, beta-spectrum, V. Perez-Mendez and H. Brown—404(L)
Intensities of weak $\gamma$-rays, G. R. Bishop, Richard Wilson, and H. Halban—416(L)
Of $I^{124}$ and $I^{126}$, Allan C. G. Mitchell, J. Y. Mei, Fred C. Maienschein, and Charles L. Peacock—744(A)
Ionization in air and A by $\alpha$-particles, William P. Jesse, Harold Forstat, and John Sadauskis—782
Of $Fe^{53}$, $Mn^{57}$, and $Cr^{55}$, production, M. E. Nelson and M. L. Pool—682
Isomerism of $Kr^{83m}$, I. Bergström, S. Thulin, and G. Andersson—851(L)

Of $La^{136}$, B. E. Robertson, W. L. Carss, and M. L. Pool—747(A)
Of La isotopes, R. A. Naumann, F. L. Reynolds, and I. Perlman—398(L)
Of $Hg^{203,205}$, $\gamma$-ray half-life, Daniel Binder—291(L)
Of $Mo^{93}$, disintegration scheme, D. N. Kundu, John L. Hult, and M. L. Pool—71, 743(A)
Of neutron, J. M. Robson—747(A)
Of Ni, search for photons, D. G. Thomas and J. D. Kurbatov—151(L)
Of $Ni^{60}$, Martin Deutsch and Kai Siegbahn—680
Of $N^{16}$, gamma-rays, C. H. Millar, A. G. W. Cameron, and M. Glicksman—742(A)
Of Pt, J. M. Cork, A. E. Stoddard, W. C. Rutledge, C. E. Branyan, and J. M. LeBlanc—843(L)
Of $K^{40}$, M. Freedman, B. Smaller, and J. May—759(A)
Of $K^{40}$, beta-rays, P. R. Bell, Boyd Weaver, and J. M. Cassidy—399(L)
Of $K^{40}$, gamma-rays, P. R. Bell and J. M. Cassidy—409(L)
Of $K^{40}$, recoil electron, R. W. Pringle, S. Standil, and K. I. Roulston—841(L)
Of $Pr^{143}$, J. Bruner, L. M. Langer, and D. Moffat—747(A)
Production of $Li^8$, S. Courtenay Wright—742(A)
Of $Pm^{147}$ and $S^{35}$, Fermi plots, H. C. Price, Jr., J. Motz, and L. M. Langer—744(A)
Of $Pm^{147}$ and $S^{35}$, low energy $\beta$-spectra, L. M. Langer, J. W. Motz, and H. C. Price, Jr.—798
Of RaD, conversion electrons of, Lawrence Cranberg—155
Of Rh, isotopes, Geoffrey Wilkinson and Harry G. Hicks—314
Of $Ru^{103}$ and $Rb^{86}$, disintegration schemes, C. E. Mandeville and E. Shapiro—439
Of $Ag^{110}$, disintegration scheme, Kai Siegbahn—233
Standard sources for beta-disintegration, T. B. Novey—742(A)
Of $Sr^{85}$, Michel Ter-Pogossian—743(A)
Systematics of alpha-radioactivity, I. Perlman, A. Ghiorso, and G. T. Seaborg—26
Of $Tc^{99}$, beta-ray distribution, B. H. Ketelle and John W. Ruch—565(L)
Of $_{65}Tb^{160}$, $\beta$-decay, S. B. Burson, K. W. Blair, and D. Saxon—403(L)
Of Sn, $\gamma$-transitions, J. W. Mihelich and R. D. Hill—743(A)
Of $Sn^{117}$, E. C. Mallary and M. L. Pool—75, 743(A)
Of $Sn^{125}$, Robert B. Duffield and Lawrence M. Langer—743(A)
Units, L. F. Curtiss, R. D. Evans, Warren Johnson, and Glenn T. Seaborg—142(L)
Of $U^{238}$, half-life, double beta-decay, C. A. Levine, A. Ghiorso, and G. T. Seaborg—296(L)
Of $Xe^{125}$, $Xe^{127}$, D. L. Anderson and M. L. Pool—142(L)

**Raman spectra**
Of $CBr_3D$, Salvador M. Ferigle, Forrest F. Cleveland, William M. Boyer, and Richard B. Bernstein—740(A)
Of $CCl_3F$, James P. Zietlow, Forrest F. Cleveland, and Arnold G. Meister—739(A)
Of $CDCl_3$, John R. Madigan, Forrest F. Cleveland, William M. Boyer, and Richard B. Bernstein—740(A)
Of hexachloroethane and hexobromoethane, Rose A. Carney, Arnold G. Meister, and Forrest F. Cleveland—740(A)
Of $H_3C\text{-}CCl_3$, M. Zaki El-Sabban and Forrest F. Cleveland—740(A)
Of 2,3-dibromo-2,3-dimethylbutane, J. E. Lamport and Forrest F. Cleveland—740(A)

**Range of particles**
Proton range-energy relation in C-2 emulsion, Hugh Bradner, Frances M. Smith, Walter H. Barkas, and A. S. Bishop—462
Of protons in several metals, T. A. Hall and S. D. Warshaw—754(A)
Straggling of electrons near critical energy, L. Eyges—81

**Recombination**
In He, D. R. Bates—718(L)

**Relativity**
Coupling of gravitational and electronic fields, Hermann Weyl—699
Motion of a charge in magnetic field, M. H. Johnson and B. A. Lippmann—702
Relativistic nuclear force, T. Toyoda—853(L)

**Scattering of electrons, neutrons, protons, and ions** (see also **Cross section; Electron diffraction**)
Cross sections for 95-Mev neutrons, twelve elements, James DeJuren and Norman Knable—606
Of 84-Mev neutrons, elastic, A. Bratenahl, S. Fernbach, R. H. Hildebrand, C. E. Leith, and B. J. Moyer—597
Lower bound, range of *n-p* interaction, A. A. Broyles and B. Kivel—839(L)
Multiple scattering in a gas, mass and energy, Gerhart Groetzinger, Martin J. Berger, and Fred L. Ribe—584
Multiple scattering of electrons in A, Fred L. Ribe, Martin J. Berger, and Gerhart Groetzinger—760(A)
Neutron cross section and phase, P. J. Bendt and I. W. Ruderman—575
Neutron scattering by liquid helium, L. Goldstein, D. Sweeney, and M. Goldstein—319
Of neutrons by light nuclei, L. E. Beghian, M. A. Grace, G. Preston, and H. Halban—286(L)
*n-p* interaction, Richard S. Christian and Edward W. Hart—441
*n-p* scattering by liquid mirror reflection, D. J. Hughes, M. T. Burgy, and G. R. Ringo—291(L)
Neutron resonance in Ag, W. Selove—557(L)
*p-p*, *n-p* interactions, P. Swan—288(L)
Resonance neutron scattering in $Na^{23}$, C. T. Hibdon, C. O. Muehlhause, W. Selove, and W. Woolf—730(L)

**Scattering of radiation** (see also **Raman spectra**)
Angular correlation of annihilation radiation, C. S. Wu and I. Shaknov—136(L)
Multiple Compton scattering, W. R. Faust—227
Multiple scattering, Melvin Lax—756(A)
Photon-photon scattering, J. C. Ward—293(L)

**Semiconductors** (see **Electrical conductivity and resistance**)

**Shock waves**
Dissipation in a tube, R. J. Emrich and C. W. Curtis—573(A)
Schlieren pictures on reflections, Edward M. Little—573(A)
Three-shock configuration, G. Rawling and H. Polachek—572(A)

**Solid state** (see **Crystalline state**)

**Spallation** (see **Disintegration and excitation of nucleus**)

**Specific heat**
Of W and Zn at low temperatures, A. A. Silvidi and J. G. Daunt—125

**Spectra, absorption** (see also **Absorption of radiation**)
Of GaCl, F. K. Levin and J. G. Winans—741(A)
Of $H_2$, vibrational lines, Masataka Mizushima—150(L)
Of HF and DF, molecular constants, Robert M. Talley, Hoyt M. Kaylor, and Alvin H. Nielsen—529
Ultraviolet continua, primary and secondary alcohols, Gladys A. Anslow and Hsi-teh Hsieh—423(A)
Of water vapor, J. J. Hopfield—560(L)
Of water vapor in near infra-red, Robert M. Chapman—741(A)

**Spectra, atomic**
Of Cb and Mo, George W. Charles—120
Forbidden lines in $Hg^{198}$, K. G. Kessler—559(L)
Forbidden *s-ns* lines in alkali metal, absorption, J. E. Mack—745(A)
Infra-red spectrum of polar aurora, W. Petrie—720(L)

**Spectra, atomic** (continued)
Isotope shift and nuclear polarization, G. Breit, G. B. Arfken, and W. W. Clendenin—569(L)
Isotope shift in C, John R. Holmes—745(A)
Isotope shift in Xe, Jørgen Koch and Ebbe Rasmussen—722(L)
Lamb shift, $n^{-3}$ law in $He^+$, J. G. Hirschberg, Jr. and J. E. Mack—745(A)
Lifetimes of Hg and K, excited states, B. Mishra—153(L)
Of U II, J. Rand McNally, Jr.—417(L)
**Spectra, microwave**
Of BrF, D. F. Smith, M. Tidwell, and D. V. P. Williams—420(L)
Of $CF_3Br$, A. H. Sharbaugh, B. S. Pritchard, and T. C. Madison—302(L)
Of $CF_3Br$, $CF_3I$, and $CF_3CN$, interatomic distances, John Sheridan and Walter Gordy—292(L)
Of $CH_2CFCl$, J. K. Bragg, T. C. Madison, and A. H. Sharbaugh—148(L); Erratum—571(L)
Dispersion in $NH_3$, George Birnbaum—144(L)
Of FCl, D. A. Gilbert and A. Roberts—742(A)
Of HCN, molecular constants, James W. Simmons, Wallace E. Anderson, and Walter Gordy—77
*l*-type doubling in OCS and HCN, R. G. Shulman and C. H. Townes—421(L)
Line widths, temperature dependence, Raydeen Howard and William V. Smith—840(L)
Of methyl alcohol, D. K. Coles W. E. Good, and R. H. Hughes—741(A)
Of nitrosyl chloride, W. Pietenpol, J. D. Rogers, and Dudley Williams—741(A)
Of $O_2$, fine structure, James H. Burkhalter, Roy S. Anderson, William V. Smith, and Walter Gordy—152(L)
Pressure broadening, L. C. Jones—741(A)
Of $S^{35}$, Victor W. Cohen, Walter S. Koski, and T. Wentink, Jr.—742(A)
Of trifluorosilane derivatives, John Sheridan and Walter Gordy—719(L)
**Spectra, molecular** (see also **Molecular structure and constants**)
Of CCl, emission bands, Putcha Venkateswarlu—79
Of $CF_2$, emission, Putcha Venkateswarlu—676
Of hexachloroethane and hexabromoethane, Rose A. Carney, Arnold G. Meister, and Forrest F. Cleveland—740(A)
Of $H_3C$-$CCl_3$, M. Zaki El-Sabban and Forrest F. Cleveland—740(A)
Intensity distribution, ($C_3\pi \rightarrow B_3\pi$) system of nitrogen, R. W. Nicholls—421(L)
Stark-Zeeman effects on molecules with nuclear quadrupole coupling, F. Coester—454
Of 2,3-dibromo-2,3-dimethylbutane, J. E. Lamport and Forrest F. Cleveland—740(A)
**Spectra, nuclear** (see also **Disintegration and excitation of nucleus; Nuclear structure; Radioactivity**)
Beta-decay of $B^{12}$ and $Li^8$, W. F. Hornyak and T. Lauritsen—160
Beta-ray spectra, effect of screening, John R. Reitz—10
Beta-spectra of $Cs^{137}$, $Y^{91}$, $61^{147}$, $Ru^{106}$, $Sm^{151}$, $P^{32}$, and $Tm^{170}$, Harold M. Agnew—655
Beta-spectrum of $Be^{10}$, P. R. Bell and J. M. Cassidy—301(L)
Of $Cu^{61}$, positron, George E. Owen and C. Sharp Cook—743(A)
$\gamma$-spectra of $Cu^{61}$, F. Boehm, J. P. Blaser, P. Marmier, and P. Preiswerk—295(L)
Of $Pr^{143}$, beta-radiation, J. Bruner, L. M Langer, and D. Moffat—747(A)
Of $Pm^{147}$ and $S^{35}$, beta radiation, H. C. Price, Jr., J. Motz, and L. M. Langer—744(A)
**Spectroscopy, technique**
Light-source, high intensity, exploding wires, William M. Conn—745(A)
**Stark effect**
In OCS, molecular dipole moments, R. G. Shulman and C. H. Townes—500
Stark-Zeeman effects on molecules with nuclear quadrupole coupling, F. Coester—454
**Statistical mechanics** (see **Mechanics, statistical**)
**Supersonics** (see also **Shock waves; Ultrasonics**)
Air condensation in wind tunnels, H. Guyford Stever—573(A)
Air flow around moving bodies, P. A. Thurston—573(A)
Conical flow, interferometric test, J. H. Giese, F. D. Bennett, and V. E. Bergdolt—574(A)
Density measurements, Eva Winkler—574(A)
Three-shock configuration, G. Rawling and H. Polachek—572(A)
Turbulent jet mixing, D. Bershader and S. I. Pai—574(A)

**Thermal radiation** (see also **Radiation**)
Neoclassical approach to blackbody radiation, B. Liebowitz—423(A)
**Thermionic emission; Emitting surfaces**
Of BaO and SrO, thin films, George E. Moore and H. W. Allison—246
Oxide cathodes, production of, L. T. Aldrich and C. E. Smith—744(A)
**Thermodynamics**
Chemical thermodynamics in Jacobian form, F. H. Crawford—423(A)
$\lambda$-point of $He^4$, effect of $He^3$, O. K. Rice—142(L)
**Thermoelectric effects**
Of Se, Herbert W. Henkels—734(L)
**Thermoluminescence**
Of $CaSO_4$: Mn phosphor, K. Watanabe—748(A)

**Ultrasonics**
Interferometer for low acoustic impedance, James L. Stewart and Ellen S. Stewart—143(L)

**Viscosity**
In isotropic turbulence, T. D. Lee—842(L)

**X-rays, absorption, diffraction, scattering, reflection, refraction, and polarization**
Absorption factors for coated cylinders, Eugene B. Hensley—744(A)
Coherent scattering, E. Arnous—149(L)
Penetration and diffusion, asymptotic behavior, U. Fano, H. Hurwitz, Jr., and L. V. Spencer—425
Resonance scattering in Pb, Ralph Dressel, M. Goldhaber, and A. O. Hanson—754(A)
Small angle scattering, D. L. Dexter and W. W. Beeman—761(A)
**X-rays, emission**
Energy distribution from 19.5-Mev electrons, H. W. Koch and R. E. Carter—165

**Zeeman effect**
Detection of radiofrequency resonance, M. H. L. Pryce—136(L)
Stark-Zeeman effects on molecules with nuclear quadrupole coupling, F. Coester—454
